Yugank Dhanderiya

B.Tech CSE (AI & ML) Student | Aspiring AI & ML Engineer |
Learning by Building Mini Projects
Jaipur, Rajasthan, India

Summary

As an aspiring AI and Machine Learning Engineer, I'm passionate about using data and intelligent systems to solve real-world problems. With a strong foundation in Python and hands-on experience with essential libraries like Pandas and NumPy, I've developed a solid understanding of data manipulation, analysis, and model building. While I may be early in my professional journey, I believe in learning by building. I'm currently focused on expanding my project portfolio, experimenting with open-source tools, and contributing to small AI applications that showcase both creativity and technical capability. I'm actively seeking opportunities—whether internships, collaborations, or mentorships—that allow me to apply what I've learned, grow under guidance, and contribute meaningfully to the AI/ML space. Let's connect! If you want to talk about anything feel free to reach out- yugankdhanderiya@gmail.com

Education

JECRC University
Bachelor of Technology - BTech · (2025)
